Re: Recommendation for Cliff Kетtemborough

To Whom It May Concern:

I have known Cliff Kетtemborough for about two years. Dr. Kетtemborough first came to my attention when I was Senior Director of Technology Programs for California State University, Northridge Extension. I interviewed him regarding several courses that we wished to offer, including technical project management, and subsequently offered him employment as a part-time instructor.

In my current position as a Program Chair at ITT Technical Institute in Oxnard, I contacted Dr. Kетtemborough and invited him to serve on our Advisory Board. I was pleased to see him at our last meeting this past May. I also invited him to teach our Data Structures course; unfortunately, he had another commitment at the time the course was scheduled.

Dr. Kетtemborough is a very personable, clear-minded, and knowledgeable computer professional. I am sure that he would prove to be an outstanding contributor to your enterprise.

Please feel free to contact me, should you have any questions.

Sincerely,

K. Anthony Iannone
